

Table 1: Comparison of LLM and Human Evaluation Scores for some Sample Claims. Metrics: Accuracy (A), Independence (I), and Clarity (C).

Claim	GPT-5.4 (A/I/C)	GPT-5.1 (A/I/C)	Gemini- 3.5- Flash (A/I/C)	Human (A/I/C)
Web-Based Volunteer Distributed Computing for Handling Time-Critical Urgent Workloads				
Browser-based volunteer distributed computing using WebWorkers and a centralized cross-origin task manager can viably execute embarrassingly parallel urgent workloads without client-side software installation across heterogeneous platforms.	4/5/4	4/5/4	5/5/5	4/5/5
Predicting Companies' ESG Ratings from News Articles Using Multivariate Timeseries Analysis				
Annual corporate ESG ratings can be inferred from news by modeling monthly multivariate timeseries that integrate weakly supervised ESG-relevance detection, sentiment ratios for relevant and irrelevant articles, and semantic topic cluster frequencies.	4/5/4	5/5/4	5/5/5	4/4/5
Fast Fog Detection for De-Fogging of Road Driving Images				
Temporal averaging of the value-to-saturation ratio computed within a vanishing-point-centered region of interest provides a fast, training-free indicator of fog presence and density in road driving images, and using this indicator to modulate transmission while detecting sky via a blue channel threshold and processing sky (gamma) and non-sky (de-fogging) separately reduces over-enhancement and sky color distortion.	4/3/4	4/5/4	5/5/5	3/4/3
RUNX2 RNA interference inhibits the invasion of osteosarcoma				
siRNA-mediated knockdown of RUNX2 in human osteosarcoma SAOS-2 cells reduces anchorage-independent growth and invasive capacity in a dose-dependent manner and is accompanied by decreased expression of VEGF, MMP-2, and MMP-9.	5/5/5	5/5/5	5/5/5	5/5/5
RETRACTED: Downregulation of FBP1 Promotes Tumor Metastasis and Indicates Poor Prognosis in ..				
FBP1 functions as a tumor suppressor in gastric cancer by inhibiting epithelial-mesenchymal transition, with its downregulation enhancing cell proliferation, invasion and metastasis and reduced expression independently associating with worse survival, supporting FBP1 as a potential therapeutic target.	3/3/4	4/5/4	5/4/5	3/3/3
Measuring and Understanding Depression in Women in Kisoro, Uganda

Claim	GPT-5.4 (A/I/C)	GPT-5.1 (A/I/C)	Gemini- 3.5- Flash (A/I/C)	Human (A/I/C)
Among women aged 18–35 seeking care in community and primary care settings near Kisoro, Uganda, symptoms reflecting cognitive impairment (difficulty thinking clearly, decision-making problems, decline in work functioning) and decreased energy (persistent fatigue, loss of enjoyment) differentiate depression more effectively than somatic complaints such as headaches, stomach problems, and sleep disturbance.	4/5/5	5/5/5	5/5/5	5/5/5
